VINPOL™

Our Commitment to Sustainability

Vinmar Polymers America, a leading distribution plastics company, prioritizes sustainability through innovative solutions. We focus on eco-friendly materials, recyclable alternatives, and collaborating with industry stakeholders to shape a sustainable future for plastics.

Vinmar installed one of Texas's largest single-roof solar panel projects at its Poly Packaging facility in Baytown, with total capacity of 1.5MW. Vinmar has also acquired two plastics recycling companies in the US and Spain. With these investments, Vinmar demonstrates its commitment to becoming an active player to help resolve the plastic waste problem our industry faces. Vinmar aims to reduce its carbon footprint while continuing to offer exceptional products and tailored solutions to its global partners and customers.
